

# Viva is for everyone

Read why patients love it

## Ellen - Patient

"The results I received for skin laxity are great. My face looks tighter, healthy and has a natural glow, which is wonderful. The treatment didn't take long and it wasn't uncomfortable either. It definitely has become my favourite treatment option. I would absolutely recommend FirmFX™ to anyone."

## Hathairat- Patient

"I have just had my second Venus Viva treatment, and my results are even more fantastic than after the first treatment. I have had noticeable improvement of my acne scars and visible decrease in the size of my pores. My skin has become more even with healthier complexion and smoother texture. I was also surprised to finally have a treatment that also reduced my post acne redness. The treatment was very tolerable even without numbing cream and I have healed completely within a few days."

## Faith- Patient

"I think my pimples dry up and only a few are coming out"

FOR FACIAL  
REJUVENATION  
TREATMENTS

الشركة الطبية العالمية  
Global Medical Co.

## TRANSFORMING THE TREATMENT EXPERIENCE

Venus Concept is once again creating new standards for innovative devices and treatment methods for facial rejuvenation solutions that deal with skin laxity, texture, lines and wrinkles.

Venus Viva™ is an all-in-one desktop delivering impressive efficacy through NanoFractional Radio Frequency™ (RF) and one-of-a-kind SmartScan™ technology, which will expand your clinic services with impressive results, increase patient satisfaction and provide a solid return on investment.

- Real ablative RF technology
- Largest variable treatment area in the industry
- Unique pattern selection technology
- Superior RF depth penetration
- Consistent selectional dermal heating
- Controlled coagulation and ablation ability
- Portability and ease of use
- Immediate and long term results
- Increased treatment options with multi-applicators

## NANOFRACTIONAL RF™ & SMARTSCAN™ – THE NEW GOLD STANDARD

Venus Viva™ is safe for all skin types and operates with the revolutionary NanoFractional RF™ and SmartScan™ technology that allows heated zone density control and unique pattern generation.

NanoFractional RF™ and SmartScan™ technology is delivered through 160 pins per tip with up to 7.5J/cm (more than 2.5 times of competitive products), and a smaller footprint per pin (150x20 Microns) resulting in minimal downtime due to micro wound.

The state-of-the-art patented tip technology with 1000 pulses and a phenomenal depth of penetration of up to 240 microns of ablation and more than 400 microns of dermal heating, provides varying energy density enabling full control of ablation, coagulation and deep dermal heating of the tissue, resulting in homogeneous skin resurfacing with minimal discomfort.

### VENUS VIVA™

The Venus Viva™ with SmartScan™ applicator utilizes superior NanoFractional™ RF technology. With impressive multiple pattern options to fit individual treatment needs, a large spot size and a small pin footprint, any operator can treat the entire face and neck on all skin types; to reduce wrinkles, fine lines, smoothen skin texture and appearance.

### SmartScan™

- State-of-the-art patented tip technology with 1000 pulses
- Ablative RF and selectional dermal heating
- Smaller footprint per pin (150x20 Microns) creating micro-wounds for shorter downtime
- Maximum coverage with minimal pain

Venus Viva™ Tip

Venus Viva™ Footprint

Unique Pattern Generator

- Pattern generator through unique algorithm enables maximum flexibility during treatment
- Energy delivered to each pin individually
- Uniform post treatment tissue appearance and minimal down time

DiamondPolar™ Handpiece

### DIAMOND POLAR

The DiamondPolar applicator provides a non-invasive skin tightening treatment, safe for all skin types, for the face, neck and hard to reach body areas. The applicator utilizes the proven (MP)² technology combining Multi-Polar RF and Pulsed Magnetic Fields. Providing no pain, no downtime or discomfort, the applicator's unique electrode placement can treat around the eyes, along the jowls and other smaller body parts to smooth skin, wrinkles and fine lines.

### EASE OF USE AND OPERATOR COMFORT

The Venus Viva™, an all-in-one desktop, is completely portable and ergonomically designed with easy to use hand pieces that provide precise and accurate treatment areas, allowing both the operator and patient to be comfortable.

- Intuitive software and auto-repeat features
- Pre-programmed or fully customizable treatment settings
- Full control of treatment parameters – power and pulse duration
- Greater control of ablation vs. coagulation ratio
- No return pads due to its patented scanning technology
- No limitations to treatment size or region
- Operators can maximize session times

Pre-programmed settings make treatments easy

### WHAT PATIENTS ARE SAYING ABOUT THE VENUS VIVA

Having researched the treatment options for removing wrinkles, I decided to have the Venus Viva treatment. The results are fantastic and with no pain and minimal downtime, I was happy to have completely healed within a few days. The results I received for skin laxity are great. My face looks tighter, healthy and has a natural glow, which is wonderful. The treatment didn't take long and it wasn't uncomfortable either. It definitely has become my favourite treatment option. I would absolutely recommend Venus Viva to anyone." – Angela, Venus Viva Patient
