

VelaShape®

Proven Clinical Results

In various clinical studies, patients report an average circumference reduction of 1-3 centimetres post treatment.^{1,2,3} A recent study of 35 patients demonstrated a 29% reduction of the thickness of the fat layer (between baseline and the 1-month follow up) as well as 97% patient satisfaction.¹

The physician's evaluation

Measurements revealed that almost all patients had some level of overall improvement in adipose tissue reduction and skin tightening in the treated areas¹

Patient satisfaction

97% of patients expressed an overall satisfaction with the treatment outcomes¹

*Between baseline and the 1-month follow up

VelaShape® III

Mastering body treatments

Cellulite Treatment • Skin Tightening • Body Contouring

Visible results in as little as one treatment

VelaShape III is the perfect, non-surgical answer for treating those 'problem areas' that cause patients to feel so displeased about their body image. Powered by eIōs technology, VelaShape III combines IR (infrared), bi-polar RF (radio frequency) and vacuum to precisely heat the tissue up to 3mm and 15mm depth respectively. This results in a localised reduction in skin laxity, volume and an overall improvement in skin structure and texture.
